

Why Choose D.Pharm or B.Pharm After 12th?

With the increasing importance of health and medicine in today's world, careers in pharmacy are more valuable than ever. If you are emotional about health science and want to create a difference in people's lives, then Diploma in Pharmacy (D.Pharm) and Bachelor of Pharmacy (B.Pharm) are excellent options after 12th (science stream).

D.Pharm(Diploma in Pharmacy)

Why choose D.Pharm?

A 2-year-old diploma course that provides basic knowledge of pharmacy practice. The ideal for students who want to enter the healthcare sector quickly and start working as a registered pharmacist. Pharmacology, pharmaceutical chemistry, hospital pharmacy and drug store management include subjects.

Career opportunities after D.Pharm:- Work as a pharmacist in hospitals, clinics or community pharmacies. Open your own medical store after registration with Pharmacy Council. Opportunity in pharmaceutical companies as sales representatives or production assistants. The option to pursue B.Pharm (lateral entry) for higher studies and development of career.

B.Pharm (Bachelor in Pharmacy)

Why Choose B.Pharm?

The 4 -year bachelor's degree focuses on pharmaceutical science and drug development. Research, production, quality control and marketing of medicines prepares students for roles. Pharmaceutical technology includes practical lab training and exposure for the latest.

Career opportunities after B.Pharm:- Pharmacists in hospitals or retail stores. Drug inspector, quality analyst, or research colleague in pharmaceutical industries. Clinical research, medical coding, or career in regulatory matters. Jobs in government sectors, PSUs and defense services. Scope for higher studies like M.Pharm, Pharm.D, or MBA in drug management.
